

# Roundtable discussion

1. How do you assess potential economic, environmental, and social impact of the Environmental Goods Agreement for Southeast Asia?
2. What are in your view advantages and challenges of the EGA for Southeast Asia?
3. Could the EGA help to improve environmental situation and fight against climate change in Southeast Asia?
4. According to the UNEP 2014 study “South-South trade in renewable energy” Southeast Asia has become net exporter of renewable energy products. Could the EGA further contribute to green growth in the region?
